

Women's Clothes Fitting Guide

Cmstylefashion.com

Introduction

Size fitting is always a problem for online shopping of clothes. Different countries and different brands adopt different standards on manufacturing of clothes. Therefore, we set up this guide to help our customers to choose suitable sized clothes from our website . There are two ways of choosing suitable clothes from our webiste. One is Lying Flat Measurments and the other is Standard Sizing.

Lying Flat Measurements

The measurements of clothes stated in our website are taken on lying flat basis for which clothes are lying flat on plane surface when measurements were taken. The methods in taking measurements are illustrated in page 3. You can easily get the fitting idea by comparing the measurements of your own clothes with our measurements. Please be reminded that never compare these measurements with your own body measurements as such comparisons will lead to a wrong idea of fitting.

Standard Sizing

On the other hand, we also use the Large to Small size indications in our sizing. In page 4, you can find a comparison table for the corresponding country size standard eg US size 8 corresponds to size Medium for your ease of choice by referencing your existing sizing system of your country.

Actual Measurements Illustration

Note :All measurements are taken in lying down basis, you should compare these measurements with your own clothes to know the actual fitness instead of your own body measurements.

Comparison of Sizing Systems of Different Countries

Size	XS	XS	S	S	M	M	L	L	XL	XL	XXL	XXL
USA	0	2	4	6	8	10	12	14	16	18	20	22
UK		4	6	8	10	12	14	16	18	20		
European		32	34	36	38	40	42	44	46	48		
Australia		6	8	10	12	14	16	18	20	22		
Japan		5	7	9	11	13	15	17	19	21		
Bust	31"	32"	33"	34"	35"	36"	37.5"	39"	40.5"	42.5"	44.5"	46.5"
Waist	23.5"	24.5"	25.5"	26.5"	27.5"	28.5"	30"	31.5"	33"	35"	37"	39"
Hips	33.5"	34.5"	35.5"	36.5"	37.5"	38.5"	40"	41.5"	43"	45"	47"	49"

Note :

-Bust, waist and hips measurements are actual body measurements which are defined in page 5.

-1 inch = 2.54 cm

Bust

- With your arms at your side, place the tape measure around the fullest part of your chest, under your arms.
- Make sure that the tape measure remains parallel to the floor.
- The length indicated on the tape measure is your bust measurement.

Waist

- While standing, wrap the tape measure around your natural waistline.
- Keep the tape comfortably loose.
- The length indicated on the tape measure is your waist measurement.

Hips

- While standing with your feet together, wrap the tape measure around the fullest part of your body between your waist and your knees. This is approximately 8 inches below your waist.
- Make sure that the tape measure remains parallel to the floor.
- The length indicated on the tape measure is your hip measurement.
